Art Unit: 1651

The application should be reviewed for errors. Error occurs, for example, in the spelling of "complotion" in claim 24 and of "L0-aspartic" in claim 25.

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/23/03 has been entered.

Claims 21-32 are being considered on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 24-32 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

No basis or support is found in the present specification for the cooling step in claim 24, specifically by "feeding the homogeneous solution into a vessel the temperature of which is preadjusted to a temperature for completion of crystallization to crystallize L-aspartic acid".

Therefore, this material constitutes new matter and should be deleted.

Claims 24-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 24 is vague, indefinite and confusing in the recitation of "feeding the homogeneous solution into a vessel the temperature of which is preadjusted to a temperature for completion of crystallization to crystallize L-aspartic acid". The particulars of the process step intended are unclear even when reading the claim in light of the specification. See also the new matter rejection, *supra*.

Claim 25 is vague, indefinite and confusing in that the antecedent basis for "the temperature of the suspension containing...". It is unclear how this temperature relates to the preadjusted temperature recited in claim 24.

Response to Arguments

Applicant's arguments have been fully considered but they are not deemed to be persuasive.

Applicants acknowledge the criticality of the requirement for a gradual cooling period. However, applicants indicate that this requirement is adequately set forth in claims 21 and 24. In response it is noted that, contrary to applicant's allegations, such limitation is not found in the recitation in claim 24 of "cooling the homogeneous solution by feeding the homogeneous solution into a vessel the temperature of which is preadjusted to a temperature for completion of crystallization...". See also the new matter rejection.

The claims 21-32 are allowable over the art of record. Claims 24-32 may be allowable upon resolution of all issues under 35 U.S.C § 112, including issues relating to "gradual cooling".
